

DARSHAN B. BANE

Mumbai, Maharashtra | +91 9372181313 | darshanbbane2000@gmail.com

PROFESSIONAL SUMMARY

Results-driven .NET Developer with 4+ years of experience building, modernizing, and supporting enterprise-grade applications using ASP.NET Core, .NET 6/8, C#, Angular, SQL Server, and REST APIs. Experienced in backend engineering, secure API development, authentication systems, enterprise integrations, application modernization, and AI-powered workflows. Strong exposure to cross-platform APIs, SaaS platforms, cybersecurity applications, deployment activities, and Agile software development practices. Proven ability to work on scalable enterprise solutions, performance optimization, legacy system modernization, and business-critical application enhancements.

TECHNICAL SKILLS

Backend Development

C#, ASP.NET Core, .NET 6/8, .NET Core, REST APIs, Minimal APIs, Web API Development

Frontend Development

Angular, HTML, CSS, JavaScript, Responsive UI Development

Database & Reporting

SQL Server, LINQ, SSRS, Power BI

Security & Authentication

Multi-Factor Authentication (MFA), Secure API Development, Vulnerability Mitigation

Cloud & Integrations

Azure Marketplace APIs, Apple App Store APIs, Firebase Cloud Messaging (FCM)

AI & Automation

Semantic Kernel, Ollama, Gemini APIs, AI/LLM Integrations

Tools & Platforms

Git, IIS, Apache, Visual Studio, VS Code

Methodologies

Agile Development, Enterprise Application Support, Application Modernization

PROFESSIONAL EXPERIENCE

10/2023 - Present

.NET Developer

MicroWorld Technologies Inc. (eScan Antivirus) — Mumbai, India

- Developed and maintained scalable enterprise APIs using .NET 8 Minimal APIs and ASP.NET Core applications.
- Integrated third-party services including Microsoft Azure Marketplace APIs and Apple App Store APIs to streamline licensing and subscription workflows.
- Implemented Multi-Factor Authentication (MFA) and contributed to enterprise security enhancement initiatives through vulnerability mitigation and security hardening.
- Improved application performance, scalability, and architecture through backend optimization and modernization activities.

- Supported migration of legacy .NET Framework and Classic ASP applications into modern .NET Core solutions.
- Designed and maintained APIs supporting Android, iOS, and Windows-based applications.
- Integrated AI/LLM capabilities using Semantic Kernel, Ollama, and Gemini APIs to enhance enterprise workflows and application capabilities.
- Developed automated certificate generation systems and deployment-ready executable applications.
- Enhanced phishing simulation platforms with SaaS-oriented cybersecurity features including QR phishing functionality.
- Worked on deployment, backend enhancement, troubleshooting, and enterprise application support activities.

01/2022 - 09/2023

Software Developer

Fabtech Consultancy Ltd. — Client: Larsen & Toubro Precision Engineering — Mumbai, India

- Worked on enterprise application enhancement and support activities within SLA-driven environments.
- Contributed to .NET Core and Angular-based internal business application development and enhancement tasks.
- Developed and enhanced SharePoint-integrated CRUD modules and backend functionalities.
- Optimized SQL queries and reporting workflows using SSRS and Power BI to improve operational reporting.
- Supported ERP LN workflows, debugging activities, and production issue resolution.
- Implemented functionality enhancements improving usability and operational workflows across internal business applications.
- Collaborated with teams for issue resolution, enhancement implementation, and enterprise application maintenance.

PROJECTS & ACHIEVEMENTS

Phishing Simulation Platform

Designed and developed a phishing simulation platform using .NET technologies with SaaS-oriented cybersecurity functionality.

Cross-Platform API Development

Built APIs supporting Android, iOS, and Windows applications with scalable backend architecture.

Authentication & Security Enhancements

Implemented secure authentication workflows, MFA integration, and enterprise security enhancement features.

AI Integration Workflows

Contributed to AI-enabled enterprise workflows using Semantic Kernel, Ollama, and Gemini API integrations.

Application Modernization

Supported modernization and migration of legacy enterprise applications into modern .NET Core-based solutions.

EDUCATION

2021

B.Sc. Information Technology

University of Mumbai

2018

Higher Secondary Certificate (HSC)

University of Mumbai
